— **Customized Premix Offerings** —

FERMENTA BIOTECH LIMITED, INDIA:

Established in 1951, Fermenta is a pioneer in Vitamin D manufacturing and an emerging player in the nutraceutical segment catering to clientele across the globe. Fermenta's facilities in Kullu and Dahej are certified by global accreditations and its world class R&D center as well as the head office are located in Thane.

Fermenta's dedicated premix manufacturing facility in Kullu, Himachal Pradesh possesses FSSAI license and is based on the 'Dry Plant' principles of stringent control over wet & dry-cleaning practices as well as separation of wet-wash & drying areas. Our formulation development lab in Thane, Maharashtra is equipped with all necessary infrastructure to develop premixes customized to your requirements.
