**1000**  
employees

**5** production sites  
in Germany, Belgium,  
Italy and Chile

**7** local offices  
in Belgium, Brazil, Germany,  
India, Singapore, Spain and USA

### Our core expertise

BENEEO offers plant-based functional ingredients for food, feed and pharma that help improve the nutritional and technical properties of a wide variety of products, while maintaining or even improving taste or texture. Through a unique chain of expertise, we offer our customers the basis for new product ideas and successful product launches. Our state-of-the-art production sites around the world ensure sustainable and high quality ingredients at all time.

## What we do.

With our ingredients we are catering to the latest trends in food, feed and pharma. Being produced in our fully owned state-of-the-art food facilities, they come with the highest quality and safety standards.

### Functional carbohydrates from sugar beet

We are the pioneers of isomalt, the only sugar replacer from sugar beet. For more than four decades this proven ingredient has been used in the production of sugar-free and 'sugar-reduced' confectionery and is the No 1 bulk sweetener in sugar-free candies.

We discovered nature's unique secret about supplying better energy: Palatinose™ (isomaltulose). It provides full carbohydrate energy in a balanced and sustained way – eliminating the undesired "boost and crash effect".

### Prebiotic chicory root fibre

Natural inulin and oligofructose are the only proven plant-based prebiotics. The scientific database for BENEØ's prebiotic fibre is the strongest in the food industry, confirming their efficacy in supporting digestive health, including the support of our inner defence, leading the market for more than 40 years.

Orafti® Inulin and Oligofructose have been proven to support weight management and help the body to absorb calcium, which is good for stronger bones. In addition, they support a low-glycaemic diet.

### Plant-based proteins

Our functional proteins are the answer to a growing interest in plant-based nutrition.

Our vital wheat gluten and our textured wheat gluten perfectly fit to the needs of bakery and plant-based savoury applications. BENEØ's rice protein is a great protein source e.g. in bars and meal replacements thanks to its high digestibility and hypoallergenic profile.

### Specialty ingredients from rice

With more than 175 years of expertise and more than 80 years of focus on food, we are a pioneer and market leader in converting rice varieties to naturally derived, functional starches, flours and highly digestible proteins.

Incredibly versatile, they are used in many applications to improve taste and texture. BENEØ's rice ingredients are also used as texturizers for gluten-free and lactose-free formulations.

### Feed ingredients

Derived from sugar beet, chicory root, rice and wheat, our feed ingredients improve the well-being of pets, horses, pigs, ruminants, poultry, fish and other species. They promote digestive health, support weight management, they are clean label and provide great taste and texture.

Highest quality and safety standards are ensured by producing these ingredients at state-of-the-art food facilities.

### Pharmaceutical excipient

galenIQ™ is a highly functional filler and binder and complies with the current Ph. Eur., BP, USP-NF and JP monographs for isomalt.

Derived from sugar beet, this versatile excipient is non-cariogenic, and makes medicine taste better. Being easy to use it is multifunctional for a broad variety of dosage forms.

# What is important to us.

We at BENE0, together with customers, suppliers and stakeholders, contribute to better nutrition and health.

## Values

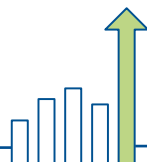

Our values guide our attitude and behaviour.

### Care

Our business is about nutrition, and ultimately about health and life itself. We are fully aware of the responsibility this encompasses and use all our expertise to deliver the best products and services.

### Improvement

At BENE0, we never stop looking for new answers to make nutrition better and healthier. We develop smart product ideas that are based on our profound insights on current and future market developments.

### Inspiration

New ideas, concepts and solutions are how we give our customers and partners inspiration for better products in an increasingly demanding market.

## Proven effectiveness

We are a company backed by science. Working with an international network of scientists from various universities, research institutes and food industry partners, we promote innovation in health and nutrition.

Our functional food and feed ingredients are approved by authorities in more than 80 countries worldwide. Their benefits can be communicated through nutrition and/or health claims.

Our pharmaceutical product range is manufactured under cGMP conditions, according to IPEC-PQG requirements, for pharmaceutical excipients.

## Sustainability

At BENE0 sustainability reaches from field to fork and beyond, providing ingredients that promote a healthy lifestyle in a holistic way. Sustainability has been built into the DNA of BENE0 since its early days and we constantly improve it along the entire value chain. This approach is reaping financial, as well as social and environmental rewards, keeping in mind tomorrow's generations.
