

POTATO STARCH

Potato starch has unique swelling temperature profile that allows to benefit from its functionality in various clean label and organic foodstuff product manufacturing. Potato starch may be used as water binder, viscosity creator, gelling and gluing agent, anti-caking and bulking agent, stabilizer, and absorbent. It also provides moisture migration prevention in baked goods and many more. Organic option also available.

COLD SWELLING POTATO STARCH

Cold swelling potato starch has excellent ability to bind water and create a viscosity in cold or room temperature. Potato starch CS is most useful in dry blends, short shelf life products or as processing agent in various organic product developments. It may replace other hydrocolloids in gluten-free bakery and also other organic applications. It is hydroscopic powder. Organic option also available.
