**For the love of humankind and in harmony  
with nature, to improve the quality of life by making  
natural products with health benefits.**

This is our mission, which has guided us in developing Aura Herbals products for more than 10 years. We have a thorough understanding of the changing world and of the "new reality". By embracing these changes we aim to help you adapt to them in the best way possible.

## Simply for health

We believe that nature presents us with a gateway to maintaining healthy lifestyles. Plants, minerals, vitamins and organic ingredients – are just some of the powerful components that are easily accessible in our daily surroundings. With this idea in mind, we actively create **products that are strongly connected to nature**. This is achieved by extracting the best from our ingredients – which we then proceed to transfer into our products in the form of high concentrations of active ingredients. Furthermore we act in compliance with the **Clean Label** principle – the fewer unnecessary fillers, the better. All of this is guided by our values and commitment to the planet and people.

## You are your own best health expert

When it comes to understanding your needs, there is no one better than you. And we, as experts, are best placed to create products that meet those needs. Although, in order to take care of your body and mind – mindfulness is an integral part of the process. When it comes to choosing products, **choose what is best for you** and not what is currently fashionable. On top of that, it is important to be able to read and understand the signals being sent by your body. Therefore, to support you in this, we are taking the following steps:

- We share our philosophy, which derives from observing the changing world and the real needs of our clients.
- We communicate our knowledge in a clear and understandable way so you can make informed purchasing decisions.
- We make friends with a healthy balance that doesn't have to be a revolution.

Because **you are your own best health expert**. We simply provide you with the best ingredients.

## In harmony with nature

Aligned with our commitment to providing people with high quality and natural products, our everyday efforts to protect the environment is equally important to us. Therefore, through sustainable efforts we have implemented **an eco-friendly packaging system**. Instead of bubble wrap and other types of plastic, we choose corrugated cardboard. We've implemented the **Zero Waste** principle – we re-use eco-friendly materials to reduce the production of new ones. Thanks to this, you can be sure that you receive environmentally and safely packaged products.

Thanks to this approach, Aura Herbals is already trusted by thousands of people, including customers of large pharmaceutical and drugstore chains. **Join us and start getting the most out of your opportunities.**

## Production facility

Due to consumer and regulatory confidence in our products it is of utmost importance who we cooperate with in Europe and around the world. We strive for steady, long-term relationships with trusted partners that share our core values.

Each of our suppliers is thoroughly vetted and we require them to provide accurate raw material specifications. We also scrupulously check and document each delivery, verify the condition of raw materials and their packaging as well as the dates of manufacturing and expiry. Any marking must be consistent with our prior arrangement.

We use **200** ingredients  
from **18** countries

**GDAŃSK  
POLAND**

**54°22'05.5"N

# Colloidal Silver Argentum200

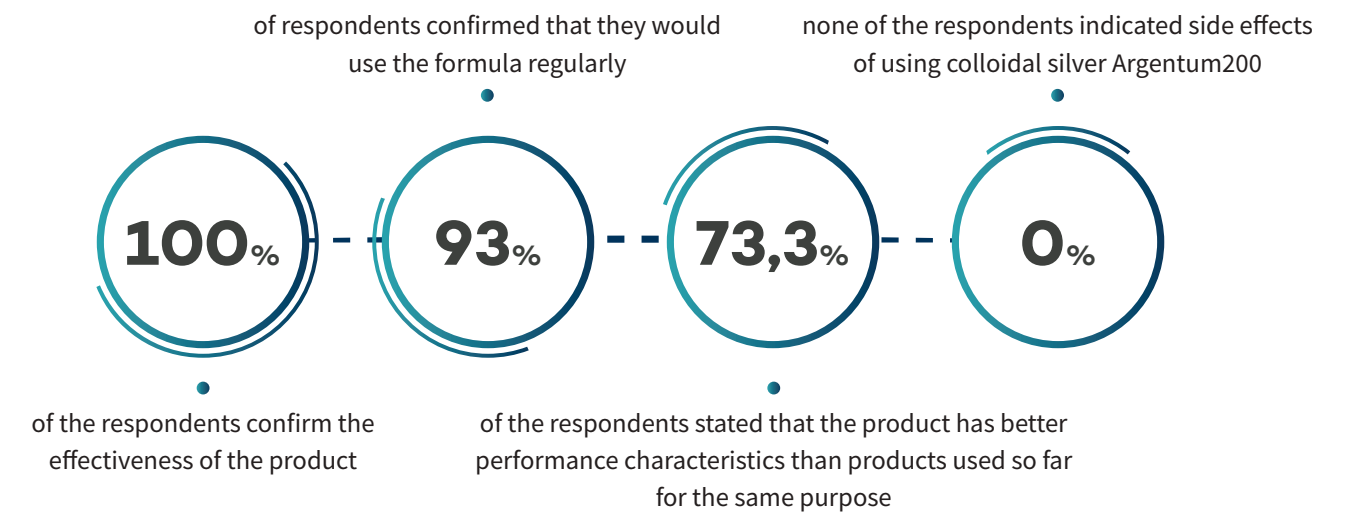

MORE PRODUCTS:

Argentum 200® is a cosmetic product with high content of pure colloidal silver. Used regularly, it cleanses, refreshes and cares for the skin. Colloidal silver Argentum200® is a so-called true non-ionic colloidal silver. It is durable and also resistant to UV radiation. The size of the silver particle is 5-15 nm. Due to their small size, the particles have a high maximum active surface area, which determines the effectiveness of the product.

Argentum200® has undergone a number of tests, including dermatological and application studies.

Studies have shown that Argentum200® Colloidal Silver is 100% safe and effective:

# Colloidal silver ARGENTUM200, liquid and aerosol tonics, 150 ml and 500 ml

True non-ionic colloidal silver in gel is suitable for all skin types.  
Contains 25, 50, 100 or 200 silver particles per 1 million water molecules (parts per million).

## The action of colloidal silver

- cleanses and cares for the skin
- soothes redness and irritations
- leaves the skin clean and matt
- suitable for skin care in acne skin conditions and skin with excess sebum
- provides a pleasant sensation of freshness and comfort
