

# Tradition for innovation

## Delivery forms

We believe in providing omega-3 in user friendly delivery forms suitable for the whole family. In addition to supplying our oils in bulk we manufacture turnkey solutions in bottles and sachets.

### Bottles

We continue to develop our technologies and methods to be sure we always supply our customers with an oil with optimal sensory profile. In the end of 2016 we installed a specially developed liquid bottling line so we can offer our customers finished product with unique formulations bottled at our facility in Norway.

### Sachets

In the same facilities we installed a new machine in 2018 for filling oil in sachets. This new delivery form will make it more convenient for the consumers to get their daily dosage in a single package, and for them to bring fresh oil on travels or just out for lunch. It is also the perfect delivery form for Pharma Marine's customers to use for sampling.

## Our products

An unique ingredient for companies wanting to stand out in the omega-3 market

CalaMarine® is produced from trimmings of food production of squid. It is an ecofriendly high DHA ingredient certified sustainable by Friend of the Sea. Trusted and offered by leading brands all over the world.

A premium quality vegan EPA and DHA product

VegMarine™ is a product line with superior sensory profile oils produced from sustainable micro algae. We offer both DHA and EPA + DHA products made from algae. This premium product line makes it possible for consumers to get their vegan daily dosage of omega-3.

A sustainable premium quality fish oil with superior sensory profile

LipidMarine™ is the perfect choice for companies in search of premium quality fish oils. We offer a wide variety of Friend of the Sea certified EPA and DHA products. All responsibly sourced and meeting international standards.

# Tradition for innovation

A delicious and easy to use omega-3 product that you can add to your favorite food

GourmetMarine™ product line includes formulations of superior omega-3 oils and various high quality vegetable oils such as extra virgin olive oil. By offering a savory path to a daily omega-3 intake we aim to connect with individuals who prefer to get their nutrients from healthy food. We hope to inspire a health beneficial gourmet menu in homes all over the world.

A premium, sustainable and eco-friendly omega-3 product with a unique tracing system

CodMarine® is produced from trimmings of food production of wild-caught cod species and is certified sustainable by both Marine Stewardship Council and Friend of the Sea.

CodMarine® is one of the most traceable omega-3 products in the world and includes a tracking system that allows consumers to identify the fishing grounds and fishing vessels involved in the making of the product they have in their hands. Backed by centuries of tradition we offer CodMarine® with premium quality and superior sensory profile.

## Traceability

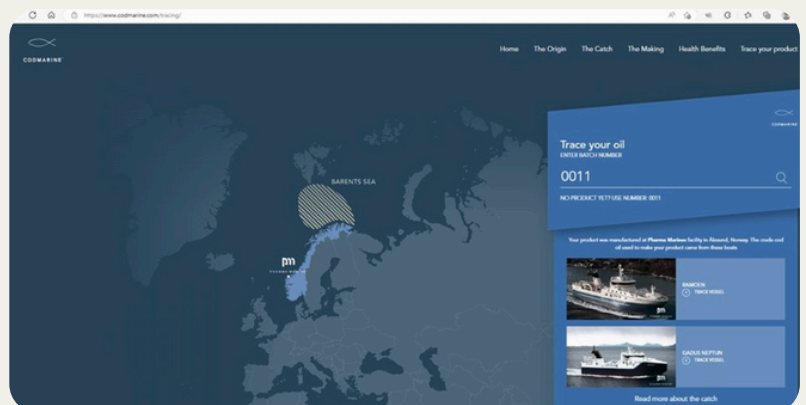

**Pharma Marine™ is proud to take the lead in this industry by establishing traceability from the consumer product back to the fishing vessels and fishing zones for our CodMarine products.**

Our customers can have this traceability system installed on their own webpage. The system also makes it possible to see where the boat processing the primary CodMarine® oil is located in real time.

With optimal traceability and transparency Pharma Marine™ is able to offer today's consumer both knowledge and trust in their superior omega-3 products.

# Tradition for innovation

## From our family to you

With eco-friendly production of marine ingredients at heart, we learn from the balance in nature to provide a healthier life for people. For Pharma Marine, tradition and innovation go hand in hand.

Pharma Marine is a family business with family values at its core. We believe in close relationships with our partners, our employees, and our local community. And, of course, an enduring respect for nature. Outside our doorstep on Terøy, there is a vast sea of possibilities. For our planet, our health, and future generations.
