

Mineral salts for

SEAWATER

aquariums

Macco Organiques is producing and offering unique pure mineral salts to be used in Marine Salt Mixes in **seasalt aquariums**. Our salts comply with the pharmaceutical grade and therefore are characterized by the **highest purity** which is essential for natural and healthy maintenance of seasalt aquariums.

Macco Organiques is testing the products on **ICP MS** which provides even lower detection limits than the commonly used ICP OES. The content of undesirable elements as phosphates, bromides, lead, copper, arsen and other **heavy metals** is on the lowest level which allows your aquarium ecosystem to flourish without having problems with insoluble particles.

Serving the clients from pharmaceutical and food industry, our products fulfill the highest quality standards. With our own technical sales and support teams, we understand the chemistry of seawater aquariums and can offer you the following **Mineral Salts**:
