# OUR HYDROLIZED KERATIN

**KERAT' INNOV**
BIOACTIVE KERATIN PEPTIDES®

- Exclusive and patented manufacturing process, ensuring a high cysteine content, water-soluble keratin, 96% bioavailable and assimilable (low molecular weight of 400-700 Da), solvent-free, and impurity-free

- Complete amino acid profile, identical to the structure of keratin in the human body

- 17 In Vitro & In Vivo studies confirming the bioactivity and efficiency of our oligopeptides

- 100% natural, vegetarian-certified, derived exclusively from high-quality wool from live, healthy sheep, with controlled origin and traceability

ISO 22000 — DEKRA Certification

ISO 9001:2015 — DEKRA Certification — DEKRA certified

ORIGINE FRANCE GARANTIE

Approved by ECOCERT RAW MATERIAL — COSMOS APPROVED

Clinically validated

# WHITE HYDROLIZED KERATIN

**Cynatine® HNS**
Clinical studies with a dosage of 500 mg/day over 30 days show benefits for:
・Hair (reduces hair loss, promotes regrowth, increases volume, shine, and vitality)
・Skin (improves hydration, reduces wrinkles, enhances elasticity and radiance)
・Nails (strength and resilience)

**Cynatine® FLX**
Clinical studies for joint health with a 500 mg/day dosage:
・Reduces pain and increases mobility
・Promotes glutathione synthesis (+17.8%)
・Reduces inflammatory markers (TNF alpha and Adamts-4) and repairs damage
・Stimulates protein synthesis by increasing collagen and GAG production

**Cynatine® TOP**
Clinical studies with dosages starting at 0.5% for:
・Hair (volume and shine from the first use, strengthens hair structure, improves resistance to styling, reduces hair loss by -43%)
・Skin (reduces wrinkles, increases hydration, luminosity, and elasticity, stimulates keratinocyte activity by boosting collagen synthesis)

# BLACK HYDROLIZED KERATIN

**Naturally contains melanin and copper**

**Melaline®**
Clinical studies with a dosage of 650 mg/day for skin and tanning:
· Stimulates melanogenesis
· Faster, deeper, and longer-lasting tan after 10 days (+225%) or 30 days (+249%)
· Supports skin regeneration
· Protects against oxidative stress, pollution, and UV rays

**Melaline® TOP**
Clinical studies with dosages starting at 0.5% for skin and tanning:
· Melanin penetrates the epidermis without migrating beyond
· Increases melanin levels in the skin
· Enhances pigmentation immediately after UV exposure
· Protects against inflammation and oxidation

**Melatine®**
Clinical studies with a dosage of 650 mg/day for gray/white hair and protection:
· Stimulates melanogenesis
· +13% repigmentation and strengthening after 120 days
· Protects against oxidative stress, pollution, and UV rays

**Melatine® TOP**
Clinical studies with dosages starting at 0.5% for gray/white hair and hair growth (in shampoos and lotions):
· Significant hair repigmentation after 2-3 months of use
· Reduction in white hair within 30-60 days
· Faster hair growth with product application
