

STR Biotech Co., Ltd.

	B65

Company Introduction

We are a pioneer in the field of immuno-modulating ingredient development. We currently develop, produce, and supply highly active immuno-polysaccharides for the human and animal health sectors.

Our immune-modulating material shows very high potency and can be used for diet supplement for various health benefits.

Benefits of our immune booster ingredients.

- The most strong edible Th1 adjuvant in the market.
- Bioassay based Quality Control.
- Shows anti-fibrosis, anti-viral, anti-bacterial, and anti-allergy effects in animal models with small doses.
